SOME EXPOSED GOOD PRACTICES with use of products Cora agrohomeopathie® IN PROFESSIONAL AGRICULTURE:

Case 1: Presentation of first experiences with testing of product Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii* / Field trial in real conditions of cultivation of cherries

Case 2: Good practice of sustainable control of seed's weeds:
Case from cherry orchard – with products Cora agrohomeopathie X7 NaturSTOP-less one- year weeds by strengthening vitality/resistance to thermodynamic stress

Case 3: PRODUCTION OF VEGETABLE SEEDLINGS WITH STRENGTHENING THEIR OWN VITALITY AND THUS THEIR OWN IMMUNOLOGY by use of products Cora agrohomeopathie®: /Trials in real conditions of cultivation of vegetable seedling in garden centre

Case 4: Professional production of vegetable with strengthening their own vitality and thus their own immunology by use of products Cora agrohomeopathie®: / Field trials in real conditions of professional cultivation of vegetable on cca 30 ha of surfaces area

Case 5: Hops growing by sustainable way - per sprinkling program with products
Cora agrohomeopathie®/Field trials in real conditions of professional cultivation of hop

Case 6: Strawberries grown without any pesticides - growing by use of products Cora agrohomeopathie®: Regular production of strawberries for market

Case 7: Raspberries grown without any pesticides - growing by use of products Cora agrohomeopathie®: Regular production of raspberries for market

Case 8: APPLICATIVE RESEARCH PROJECT:
Effectiveness of the product Cora agrohomeopathie X62 in case of drought and high temperatures in growing seasons:
By strengthening plants vitality, implicit successful & efficient strengthening of agricultural plants and crops on their ability to adapt to Climate Change – to the conditions of drought and high temperature - in such conditions growing without watering

Introduction

About Company:

Official name of Company:

PH. AGROHOM., Agrohhomeopatija za rastline in škodljivce, Ing. Majda Ortan s.p., Ob Meži 30, SI 2391 Prevalje, Slovenija, EU.

Private company , 100% owned by Ing. Majda Ortan

Size and age: small company, 7 years old

Responsible person: Ing. Majda Ortan, Company's Executive Director, Owner, Founder – [Introduction is under link here](#)

Activities of the Company:

- Developing of energized, sustainable natural products for plants strengthening ,
- Manufacturing – in our own production,
- Sale them – under different brands - Cora agrohhomeopathie® and also others,
- Exclusive rights regarding to my own developed products (currently available on Slovenian market under brand Cora agrohhomeopathie®), to:
 - advice,
 - educate,
 - sharing and spread good practice achieved with products,
 - marketing,
- export of products and also to granted rights for their sales (distribution) on foreign markets

GOOD BUSINESS COOPERATIONS WITH US IS POSSIBLE. WE STARTED AND WE WANT TO GROW OUR BUSINESS ALSO ON OTHER CONTINENTS, OUTSIDE OF EU! GOOD PROPOSALS FOR BUSINESS COOPERATION ARE WELCOMED! FOR BUSINESS COOPERATION YOU ARE WELCOMED TO CONTACT US!

Under link: Our Participation in International Projects

All advanced, innovative , sustainable energized productus without active substances (currently placed on Slovenian market under brand Cora agrohomeopathie®), are self developed by Ing. Majda Ortan, owner and Director of our company..

She owned 100% of their material rights, all rights for their recepies, all rigts for their production technology and production (manufacturing), and all rigts to produce them, to sell them, to granted rigts for their sales (distribution) on foreign markets.

All inovative knowledge is till now still stayed her strong business secret. If you want to establish with her company good business relationship, you may not wait any more. We can be sure that those products without active substances, will be already in the near future on large rise. They bring in food growing innovative, clean, advanced and sustainable solutions that are needed for people, nature and the world.

Ing. Majda Ortan, spent great part of her life to developed comprehensive program of high professional, advanced, innovative, sustainable products, which are in Slovenia currently known under brand Cora agrohomeopathie®. In five growing season was confirmed product's very good effectivness in professional growing. Very good practice with their usage, were already presented on scientifics conferences with international participation, on Institutions of knowledge, on International projects, in Slovenian National TV reportage, in many articles, in book Simphony of ballance (by Majda Ortan and Miša Pušenjak), on wokshops, seminars, by personal advising.

*If you want to find
the secrets of the
Universe,
think in terms of
energy, frequency
and vibration.*

- Nikola Tesla

Products Cora agrohomoepathie® are innovative, self developed products for natural, sustainable cultivation with strengthening the vitality of the plants and so indirectly strengthening of plant resistance to plant diseases, pests and stress.

Their comprehensive, complex offer enables professional spraying programs for a wide range of agricultural crops.

Vital plants are more resistant to plant diseases, pests and stress.

Products are currently available only on Slovenian market.

Warning: In different countries, the legislation for such plant – strengthening products, is different.

Products Cora agrohomoepathie® do not contain active substances. Active are energy vibrations of complex of suitable plants and minerals, which are results of specific agrohomoedynamics & homeopathic procedures, therefore they are also called energized homeodynamic (agrohomeopathic) products. Those active vibrations are stabilized on the carrier medium (43% ethanol). Thus, the shelf life of these products is 3 years.

Unlike most of today's existing products on the market, that principally work (affect) directly on the plant problems (diseases, pests, stress), **products Cora agrohomoepathie® by holistic approach work directly on plants by strengthening their vitality balance and by that indirectly strengthening plant resistance to diseases, to pests, to stress due to the environmental impacts.**

Products Cora agrohomoepathie® are innovative, self developed products for natural, sustainable cultivation with strengthening the vitality of the plants and so indirectly strengthening of plant resistance to plant diseases, pests and stress.

Their comprehensive, complex offer enables professional spraying programs for a wide range of agricultural crops.

Vital plants are more resistant to plant diseases, pests and stress.

Products Cora agrohomoepathie® are not phyto-pharmaceutical products → vital plants without use of agrochemicals.

They are used appropriate diluted with water, as spray, applied by the normal spraying equipment.

Recommended is preventive use – preventive use is an advantage – in the correct and timely use, may be avoid the loss of crops.

Without withdrawal period after the spraying – the crops are edible also immediately after spraying!

Products Cora agrohomoepathie® **do not contain active substances.** Active are energy vibrations of complex of suitable plants and minerals, which are results of homeodynamics & agrohomoepathic procedures, therefore they are also called energized homeodynamic (agrohomeopathic) products. **Those active vibrations are stabilized on the carrier medium (43% ethanol).** Thus, the shelf life of these products is 3 years.

Effective!

Longer lasting effects.

After four hours after spraying, the rain do not wash effect of spraying anymore!

Safe for humans and animals!

Negligible carbon footprint!

Safe for the environment !

NATURAL, ENERGIZED HOMEODINAMIC & AGROHOMEOPATHIC PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

NATURAL, ENERGIZED HOMEODINAMIC & AGROHOMEOPATHIC PRODUCT WITHOUT WITHDRAWAL PERIOD!

-Drosophila Suzukii (Drosophila suzukii Matsumura), come from Asia and is highly invasive alien species of insects, which appeared in Europe in 2008.

-Unlike other species of the genus Drosophilidae, has the ability to hatch eggs in healthy, undamaged mature fruits.

-Most of the damage cause the larvae, which feed on juicy part of the fruit. Further, the wounded surface are entry point for a variety of pathogens, that cause decay.

-Crop failure and introduction of additional measures, cause an increase in production costs, destroy mature crops, in the stage just before harvest or in the stage of harvest.

-Due to the phase of mature crops, attacked by this pest, repression by conventional means is very difficult, because of the withdrawal period.

-In Slovenia, its presence was first time confirmed in 2010.

Behind photo: The presence of Drosophila suzukii ® in Slovenia, for the years 2012 to 2014

Source: Phytosanitary surround portal - UVPH

On the initiative of some professional agronomists - advisers, was ing. Majda Ortan s.p., in year 2015 developed new product Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii*.

The product has been confirmed by the Institute of Organic Agriculture (Faculty of Agriculture and Life Sciences, University of Maribor, Slovenia), that IS ALLOWED IN ORGANIC PRODUCTION.

Natural, energized Homeodinamics & agrohomeopathic PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

WITHOUT WITHDRAWAL PERIOD AFTER USING THE PRODUCT!

**Explanation: The meaning of the name is in detail explained in the product catalog [here](#). I point out, that the word "CONTRA" in the names of Cora agrohomeopathie ® products is the random word combination and does not mean "against".*

PRESENTATION OF FIRST EXPERIANCES
WITH TESTING OF PRODUCT Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii*
(Photos: photo arhiv Iztok Janežič)

NATURAL, ENERGIZED HOMEODINAMIC & AGROHOMEOPATHIC PRODUCT
WITHOUT CONTAINING ACTIVE SUBSTANCES! WITHOUT WITHDRAWAL PERIOD!

First time it was tested in year 2015, under real production conditions of the early cherries.

Functioning of the product X104 Cora agrohomeopathie NaturSTOP CONTRA Drosophila suzukii *, was monitored in the orchard of cherries on the surface of 0.50 hectares at a location along the Dragonja in Sečovlje valley (Slovenia).

The test was performed in cooperation of Slovenian partners:

- **PH. AGROHOM.,** Agrohomeopatija za rastline in škodljivce, Ing. Majda Ortan s.p., (product's developer and producer) - **develop and provide products,**
- **Iztok Janežič** – specialist of fruit growing, (Sivis, d.o.o.) -**test plan and professional monitoring,**
- **Dejan Pribač,** farmer - **spraying his cherry plantation per test plan**
- **and some other participations.**

**Explanation: The meaning of the name is in detail explained in the product catalog [here](#). I point out, that the word "CONTRA" in the names of Cora agrohomeopathie ® products is the random word combination and does not mean "against".*

Cherry plantation, where we in 2015 performed the field test of the effectiveness of the product Cora agrohomeopathie X104 Drosophila suzukii*

PRESENTATION OF FIRST EXPERIENCES WITH TESTING OF PRODUCT Cora agrohomoepathie X104 NaturSTOP-CONTRA Drosophila suzukii*

(Photos: photo arhiv Iztok Janežič)

NATURAL, ENERGIZED HOMEODINAMICS & AGROHOMOEOPATHIC PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

First time it was tested in year 2015, under real production conditions of the latest cherries.

Weathering was in season 2015 at the beginning of the harvest cherries, quite favorable for cultivation.

In the days around May 15, due to the high humidity and good air temperatures, was represent good conditions for reproduction and possible high problems with Drosophila suzukii on the early varieties of cherries.

With the use of the product Cora agrohomoepathie X104 Drosophila suzukii*, we have very effectively avoid to this danger, at the later ripening varieties, until the finishing of harvesting at 15 June 2015.

The first treatment with product Cora agrohomoepathie X104 was done, when it was established almost 80% of the damage of fruits of early variety 'Burlat' and part of the fruit variety 'New Star', in terms of 14., 15. and 29. May 2015. SINCE IN THE SAME PLANTATION, THE LATEST VARIETIES OF CHERRIES WAS SPRINKLED AND OBSERVED, THIS WAS THE PREVENTIVE USE OF PRODUCT Cora agrohomoepathie X104 Drosophila suzukii* FOR LATEST VARIETIES OF CHERRIES!

Checking of baits was performed 15/6/2015, after harvesting of all varieties of cherries in test. After the examination and identification in the laboratory, it was found, that 73% of checked caught insect, belonged to the specimen Drosophila suzukii.

Thus it was confirmed the presence of high populations of Drosophila suzukii at the location during the performance of the experiment.

After treatment, the harvest of later varieties 'Isabelle', 'Celeste' 'Garnet', 'Canada giant', 'Van', 'Kordia', 'Regina', on fruits there was NO DAMAGE. THE FRUITS WERE HIGH QUALITY AND SUITABLE FOR STORAGE AND SALE.

Our good practice of sustainable control of seed's weeds:

Case from cherry orchard – with products Cora agrohomeopathie X7 NaturSTOP-less one-year weeds; by strengthening vitality/resistance to thermodynamic stress

(Photos: photo arhiv Iztok Janežič)

- In the last two years have been by the effects of the operation of this product, already satisfied home gardeners and also some of professional growers of vegetables.
- Practical experiences are the effects of the operation of the product, this year we disseminated among professional fruit growers.
- In the year 2016, we monitored and disseminate practical experiences of the effects of the functioning of this product, among some Slovenian fruit growers, under professional monitoring of Iztok Janežič, specialist of fruit growing (Sivis d.o.o., Ljubljana, Slovenia). Best results were recorded by fruit grower, Avbelj Brane. (Slovenia), in his cherry orchard.
- It was confirmed that for the good effect is extremely important to follow to some key parameters :
- Spraying should be carried out before the seeds germinate, when the soil temperature reaches about 5 degrees Celsius. If this phase delays, targeted effects are missed.
- The effect of the spray can be interrupted by frost. If after spraying gets to spring frosts, is needed to spraying again - and this makes sense only on condition, that weed seeds are not yet germinated.
- **Considering these facts, the results are excellent.**

PRODUCTION OF VEGETABLE SEEDLINGS WITH STRENGTHENING THEIR OWN VITALITY AND THUS THEIR OWN IMMUNOLOGY

(Source: Production of vital vegetable seedlings - Strengthening of their own resistance, article published in Slovenian Magazine Kmetovalec, 2/16, by author Ing. Majda Ortan
Photos: by Tanja Hribar)

Production of vegetable seedlings is intensive increasing trend.
Consumer's interest in sustainable grown seedlings of vegetables, is ever growing.

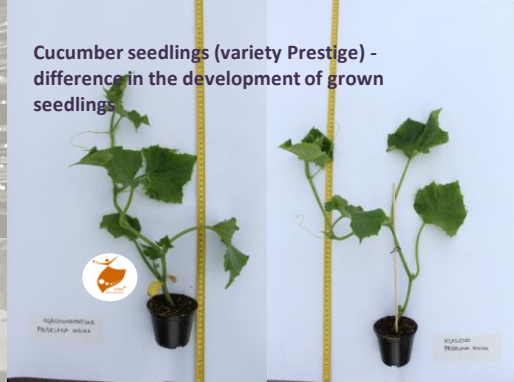

The sustainable cultivation (on "classic way"), usually means more manual work, more seedlings collapses due to non-resistance. Because of non-resistance of plant's seedlings, is such mode of production of vegetable seedlings, often under question.

With program and products Cora agrohhomeopathie®, we may do it excellent.

In year 2015, was such program great implemented in Arboretum, Volčji Potok (Slovenian state park and renowned garden's centre).

You may see some considerable differences in developed roots and developed grown seedlings. Those, with sign (logo) of Cora agrohhomeopathie® are growned with products Cora arohhomeopathie®, and on such mode strenghteneing their own vitality and their own immunology to diseases, pests, stress. As it is visible, they are much stronger as those, which were grown on classical mode.

Cucumber seedlings (variety Prestige) - difference in the development of grown seedlings

Cucumber seedlings initial-stage and growth stage

Grown tomato seedling (variety Red lion), difference on developed seedlings

Grown tomato seedling (variety Cristal) difference on developed root system

Grown lettuce seedling (variety Funly), difference on developed root system

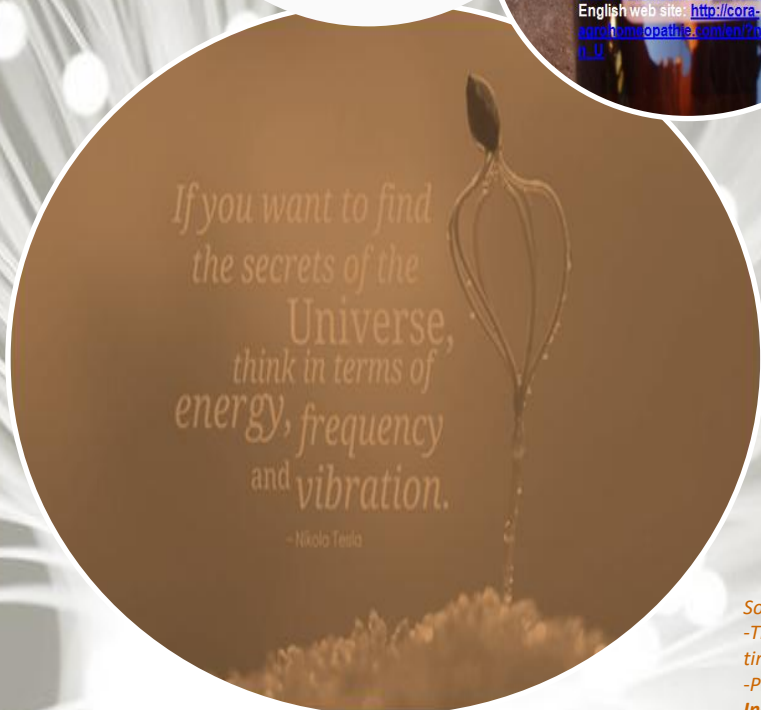

Grown lactusa seedling (variety Funly), difference on developed seedlings

SOME EXPOSED GOOD PRACTICES with use of products Cora agrohomeopathie® IN PROFESSIONAL AGRICULTURE

Case 4:
**PROFESSIONAL PRODUCTION OF VEGETABLE WITH
STRENGTHENING THEIR OWN VITALITY AND THUS
THEIR OWN IMMUNOLOGY**
**Field trials in real conditions
of profesional cultivation of vegetable on cca 30 ha
of surfaces area**

Sources:

- The agricultural broadcast *People and Earth*, played on the Slovenian National TV - RTV SLO 1 on 28.6.2015 reportage in running time from 19.54 to 23.52

Case of professional growing vegetables per sprinkling program with products Cora agrohomeopathie[®], (years 204, 2015)

Cooperation of:

Grower: farmer Ivan Kelenc, Formin at Gorišnica, Slovenia,
production area: approximately 32 ha.

Sprinkling program, products, consulting: PH. AGROHOM.,
Agrohomeopatija za rastline in škodljivce, Ing. Majda Ortan,
s.p., Slovenia, www.cora-agrohomeopathie.com

Farmer's regular profesional agriculture adviserin: Miša
Pušenjak, Chamber of Agriculture, Slovenia - Agriculture and
Forestry Unit of Maribor, Slovenia

Project focus, general:

The farmer produced in compliance with Integrated
production system.

In the years 2014 and 2015, Cora agrohomeopathie[®],
products were used.

Farmer avoided the use pesticides.

Very good results were achieved. Farmer present some of
them to Slovenian public on Slovenian national TV - RTV
SLO 1, in agriculture emit People and Earth.

Case of professional growing vegetables with products Cora agrohomeopathie®

The farmer shared his great experiences with products Cora agrohomeopathie® on the agricultural broadcast *People and Earth*, played on the Slovenian national TV - RTV SLO 1 on 28.6.2015

Photo: The farmer Ivan Kelenc, was in growing season 2014, with the use of products Cora agrohomeopathie, on cca 32 ha,

harvested about 1.000 tons of healthy vegetables. And this despite to the fact, that the weather in the growing season 2014 was extremely wet! Such harvest in the past, he has been grown in good growing seasons, by integrated production system, with the use of pesticides!

Good practice case: HOPS GROWING BY SUSTAINABLE WAY - per program with products Cora agrohomoepathie[®], by farmer: Šlander, sort of hop: Aurora, year 2013 *(Photos: photo arhiv Majda Ortan)*

Field trial was performed by cooperation of:

-Štefan Šlander - grower-farmer, Savinjska Valey, Slovenia,
-PH. AGROHOM., Agrohomoepatija za rastline in škodljivce, ing. Majda Ortan, s.p - developing of products Cora agrohomoepathie[®] for hops, sprinkling program for hops with products Cora agrohomoepathie[®],
-Farmer's profesional adviser – employee in Hmezad exim, d.d., Slovenia; Hmezad exim d.d., Slovenia; this company was at company PH. AGROHOM., Agrohomoepatija za rastline in škodljivce, ing. Majda Ortan, s.p. also buy Cora agrohomoepathie[®] products for experiments in hops.
-Institute of Hop Research and Brewing, Žalec, - additional professional monitoring of sprinkling hops.

The growing season of 2013 could be remembered after severe drought. Farmers were watered in the fields so said “day and night”, also in hops...

“Our hops”, we did not watered. Vital plants grown with Cora agrohomoepathie[®], products are more resistant to vegetal stress due to drought.

It was also on our hop, which showed excellent results in the quantity and quality of hops cones, grown in our field trial -summary on the next slide.

In next year (in 2014), hop with Cora agrohomoepathie[®] products were grow growers: Orožim, Šporn, Škrabar, Šlander – all from Savinjska valey, Slovenia.

In that growing season, there was a lot of rainfall. Results of our trials were interesting and instructive. For more detailed information you may ask me on email address:

agrohomeopathie®, by farmer: Šlander, sort of hop: Aurora, year 2013
(Photos: photo arhiv Majda Ortan)

PLANT'S DISEASES AND PESTS, ECONOMICALY DAMAGE
caused by diseases and pests:

Weather conditions in 2013 was generally unfavorable to development of downey mildew .

Red spider mite -Tetranychus urticae:

First appearance was on 8th of August 2013,
it were present in constant population – **it has not been caused economically important damage by Red spider mite -Tetranychus urticae !**

Hop flea beetle - Psylliodes attenuatus:

both generations were present – **it has not been caused economically important damage by Hop flea beetle - Psylliodes attenuatus!**

Hop Damson Aphid - Porodon humuli:

showed interesting population dynamic. After first spraying - cycle, their population grown up. Explanation is, that on starting of effects on energy balance system of plants, some plant's reaction occurred. So, for short time plants weakened, than their immunology started to strengthen. On weakened plants came more aphids, but despite of quick improvement of hop vitality, they didn't caused damage. Results of hop aphids indicate different mechanisms of controll of pest population compared to controll applications.

It has not been caused economically important damage by Hop Damson Aphid - Porodon humuli!

RESULTS – YIELD PER QUANTITY
AND QUALITY:

Harvested on 6th of September, 2013.

Yield:

•**Quantity:** calculated 1.182 kg/ha
(overall avg. 2013: 1186kg/ha) → **we got practically the same yield, without wattering of hop – despite dry growing season!**

•**Quality:**

•**Alpha acid content:** 7.4 % (overall avg.2013: 5,7%) → **We got for cca 29% better quality parameter of Alpha acid content!**

•**Corns:** health, no economical damage!

*Explanation: The meaning of the name is in detail explained in the product catalog [here](#). I point out, that the word "CONTRA" in the names of Cora agrohomeopathie® products is the random word combination and does not mean "against".

Privacy: [SLO](#), [EN](#), Terms: [SLO](#)

Case of professional growing of strawberries without pesticides - per sprinkling program with products Cora agrohomoepathie[®], (year 2019)

Cooperation of:

- Grower: Fruit-grower: Janko Krošelj, Kmetija Krošelj/ Krošelj farm, Slovenia, [web site](#)

Planted strawberry seedlings : 25.000 pc.

Crops quantity: 10 tons (10.000 kg)

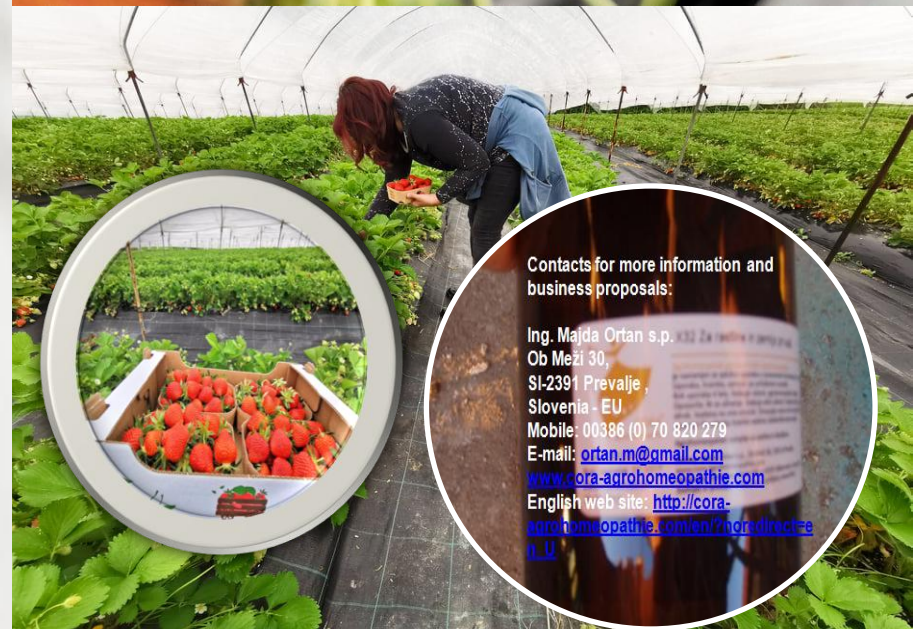

Crops quality: excellent

- Sprinkling program, products, consulting: PH. AGROHOM., Agrohomoepatija za rastline in škodljivce, Ing. Majda Ortan, s.p., Slovenia, [EN web site](#)

- Farmer's agriculture adviser: Iztok Janežič, ing., fruit growing specialist

Experiences, general:

After gaining experiences in growing season 2018, in growing season 2019 fruit-growers family Krošelj in growing of their whole production of strawberries only used products Cora agrohomoepathie[®] to avoid the use of pesticides as well as any other products. All problems with diseases and pests were very successfully prevented/ controlled (included botrytis, roting, aphids, Drosophila suzukii..). So, with products Cora agrohomoepathie[®] were grown around 10 tons of organic, energy alive strawberries, with amazing taste, smell and very good durability life in the refrigerator - to about 14 days. They sold them directly to the consumers by farm and by Zeleni krog/Green circle, which daily directly delivers fresh crops from farmers consumers. Customers-consumers literary grabbed them, their feedbacks were great.
