We are not human beings having a spiritual experience; we are spiritual beings having a human experience.

— Pierre Teilhard de Chardin

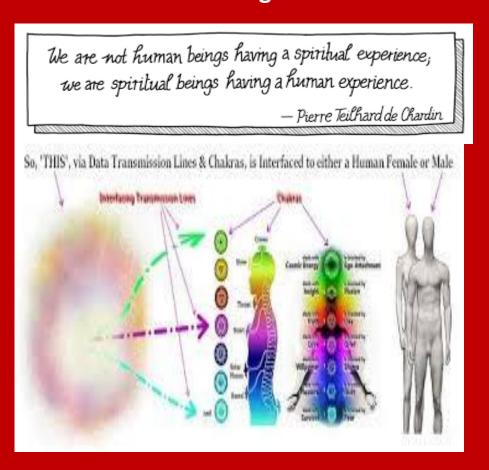

Everything in the Universe is energy and all energy exists at different levels of vibration and frequency, so planets and their inhabitants vibrate at different levels. Every mineral, plant, animal, human, ecosystem, vibrate in diferent vibration levels. Energy is all around us. Actually, we are energy, and when we need to heal our physical bodies, we do so by applying the right mode to raise our vibration to correspond with the energy of well-being. Everything vibrates, life is vibration. So is mind. So is matter. Electricity or vibration is that same energy, same power, we call God. All forces vibration, as all comes from one central sorce of vibration – taking different form.

Electricity is God in Action! Seeing this, feeling this, knowing this, ye will find that not only does the body become revivified, but by the creating in every atom of its being the knowledge of the activity of this Creative Force or Principle as related to spirit, mind, body, all three are connected.

Source: Sonja Papadimitriou

We are much more than what we perceive ourselves to be, and it's time we begin to see ourselves in that light.

As energetic beings therefore, our energy can connect to all other energy. Consciousness brings the two together, and at the moment it does, the formative force originates. Consciousness is primary. Energy and information are secondary. A formative force originates from life energy and information, but only when consciousness connects to them.

Theoretically, according to David Bohem's theory of the Holotropic Universe, if we knew how to we could intuitively know all there is to know. We experienced connecting with the universal net of energy and it felt as if we were a part of everything, the stars, space, trees, oceans, and people.

Quantum physicists discovered that atoms are vortex of energy that are constantly spinning and vibrating, each one radiating its own unique energy signature.

Therefore, if we really want to observe ourselves and find out what we are, we should take into account, that we are really beings of energy and vibration, radiating our own unique energy signature -this is fact and is what quantum physics has shown us time and time again.

Quantum physics also tells us that our intention creates our reality. The famous particle/wave experiment where the scientist who expected to see a particle saw a particle and the scientist who expected to see a wave saw a wave. So setting our intention becomes very important. It is the power of our intention that creates the reality in the quantum world and what is created in the quantum world becomes the reality in our physical world.

HUMANS CAN EXCHANGE ENERGY WITH EACH OTHER, JUST LIKE PLANTS DO WWW.Learning-Mind.com

There are three "elements" responsible for the development of life: life energy, information, and consciousness.

Life energy has the ability to take shape. Information has the ability to inform and to create form. Both need each other, but neither forms a connection with the other on their own accord.

Each culture has given its own name to it. Therefore it is called "The energy with a thousand names." What are we talking about?

Life energy! Life energy has been known all over the world since antiquity, and almost every culture has a name for this energy. Chinese call it ch'i, which is similar to the Greek pneuma, the Latin spiritus vitalis, the prana of yoga, the mana of the Kahunas in Hawaii, the Light of the Christians, the ka of the ancient Egyptians, and the ki in reiki. In our culture you will encounter life energy as the fluidum of mesmerists, the aether of anthroposophy, the od of Reichenbach, and the orgon of Wilhelm Reich. In all cases, they speak of a subtle energy that is universal, which includes all and penetrates everything.

This energy is the carrier of the processes of life and connects everything to everything else. Matter is formed by it. Life energy is usually mentioned together with life force. It has healing, magnetic properties. So we live in a swirling sea of zero-point energy in which everything and everyone bobs up and down.

The world is filled with all sorts of life, which appears in many different forms. There is huge diversity, and that makes life fun, rich, surprising, and interesting. But where do these types of life come from? What "forms" them?

These kinds of questions have to do with what biologists call morphogenesis, the origin of the form (Greek: morphe = form; genesis = origin). It is one of the great unsolved mysteries of the biological sciences. For many years scientists thought that this is genetically programmed, but now it appears this is far from the whole truth.

Genes determine the sequence of amino acids, the building blocks of protein molecules. Other genes determine the moment in which special proteins are formed. In this way the right protein originates at the right moment during the development of the organism. But it is an ongoing mystery how the characteristic form of the body emerges from these building materials.

Your arms and legs are chemically identical, but they have different shapes. While the genes supply the building blocks for the material of the body, the blueprint for the shape or design of the organism is missing. Where is the blueprint?

Morphic fields contain information and can be compared to a script that a system can use to organize itself. The field, as it were, informs matter: InFORMation goes into form and becomes matter. It is like incarnation, where spirit manifests itself in human form. Information does the same—it becomes form. From the connection between this life energy and information comes a formative force. If this formative force connects to matter, a life form originates.

Do you know, what I'm now thinking about? Let me to share this with you:

Humanity is carrious about of free energy. But mostly people are not aware, that they already have it and use it.

Life Energy is Free Energy!

Think about this!

Do you recognize yourself as an energy being?

Do you know how to manage your life energy?

Can you manage yourself as an energy being?

Are you aware of the abilities you have as an energy being?

Do you know how to awaken, strengthen, stabilize, and stabilize your abilities as a creature at a higher level of consciousness, such as 3D?

Let me to support you, to become aligned with current energies level on the Earth. You may learn more about it <u>under this link.</u> You may contact me for expert support! -Common sense

Each person should seek to balance the two energies within them to become a whole being. If they are severely lacking in one type of energy, they may strengthen that by example of another person, but should not rely on an equally imbalanced person to complete their energy through partnership. Two crutches do not allow for walking with ease. Only two strong legs allow for that. By nature, most people will tend to be stronger in some energy and weaker in other throughout life. Some life situations require more of one energy than another to be successful, as they are not completely balanced situations. The goal is not to achieve 50%-50% balance, but to become aware of these energies and be able to utilize them when they are needed.

Morphogenetic fields are postulated idea of a collective subconscious, to which each member of the species is more or less coupled and through which he has access to a whole series of knowledge, archetypes and customs.

»Morphogenetic fields are not fixed forever, but evolve. The fields of Afghan hounds and poodles have become different from those of their common ancestors, wolves. How are these fields inherited? I propose that that they are transmitted from past members of the species through a kind of non-local resonance, called morphic resonance.

Over the course of fifteen years of research on plant development, I came to the conclusion that for understanding the development of plants, their morphogenesis, genes and gene products are not enough. Morphogenesis also depends on organizing fields. The same arguments apply to the development of animals. Since the 1920s many developmental biologists have proposed that biological organization depends on fields, variously called biological fields, or developmental fields, or positional fields, or morphogenetic fields.

The morphic fields of social groups connect together members of the group even when they are many miles apart, and provide channels of communication through which organisms can stay in touch at a distance. They help provide an explanation for telepathy. Telepathy is normal not paranormal, natural not supernatural, and is also common between people, especially people who know each other well.

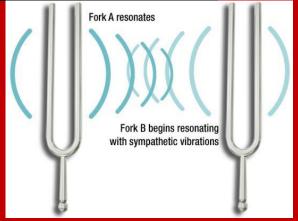

The morphic fields of mental activity are not confined to the insides of our heads. They extend far beyond our brain through intention and attention. We are already familiar with the idea of fields extending beyond the material objects in which they are rooted: for example magnetic fields extend beyond the surfaces of magnets; the earth's gravitational field extends far beyond the surface of the earth, keeping the moon in its orbit; and the fields of a cell phone stretch out far beyond the phone itself. Likewise the fields of our minds extend far beyond our brains.«

An attunement works on the understanding that everything is energy, including yourself.

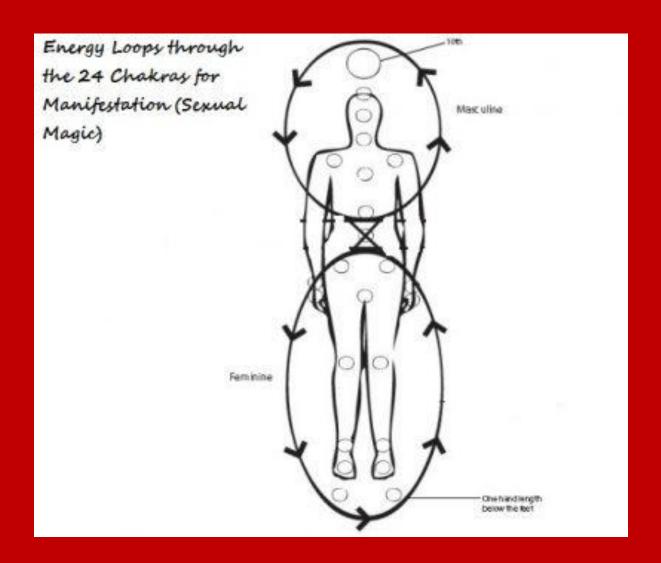

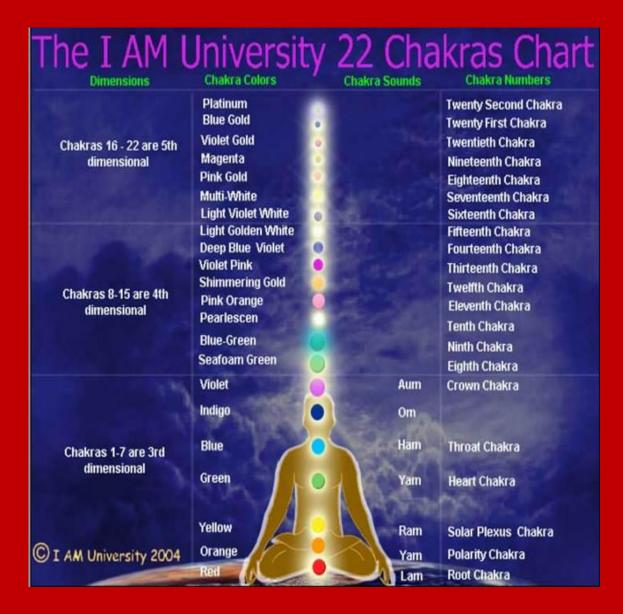

An attunement is an energetic process that aims to allow you to remember, and access in the future, a range of energies by temporarily increasing these desired energy ranges within you that are already a part of you. It does this so you can remember yor feelings of those energies again and then more easily activate them in the future as you have been reminded of their frequencies.

Attunements form an integral part of many different types of energy healing practices and are there to assist you in remembering and accessing different types of energies. This has the potential benefit of significantly accelerating your spiritual development and reducing your time in trying to access these energies yourself. However, attunements are tools, and should not be solely relied upon in any spiritual work. This is because the person who creates the attunement is typically only accessing a range of energies that they can access. It may not be all the energies available for that specific need, so always use an attunement as a starting point.

Attunement may be explained as the reactiveness we have to another person. It is the process by which we form relationships.Dr. Dan Siegel says, "When we attune with others we allow our own internal state to shift, to come to resonate with the inner world of another. This resonance is at the heart of the important sense of "feeling felt" that emerges in close relationships. Children need attunement to feel secure and to develop well, and throughout our lives we need attunement to feel close and connected."

Human energy system included energy centres. You for sure know them under name chakras.

In current time, some people still thing, that they have 7 chakras.

So is good to know, that chacras system is upgrade – activated, when human raise consciousness to a higher dimension, to a higher level.

Humanity more or less leaves the 3 D level of consciousness, passes into the 4D stage and further to the 5D stage of consciousness. Each stage is "less dense", more subtle, in a characteristic higher energy vibration. By the way: This is why staying in 5D is enormously easier, richer - which is why we know this level of consciousness as the Golden Age of Humanity.

The 4th level of consciousness can be imagined as an energy funnel that serves to move from a 3D consciousness stage to a 5D consciousness stage.

In the 4D level of consciousness, the system of the fifteen chakras is activated. In the level 5D the system of twenty-two chakras is activated.

COHERENT SELF, COHERENT WORLD

The law of coherence helps us understand the physical force behind the increasing complexity of the evolutionary process, from quanta, to cells, to selfawareness and collective consciousness. The coherent electromagnetic field is the inner glue of every system, the "intelligent" energy-information communication that assures a cooperative and synergic behavior to all the components of the system, as a whole, allowing harmonious evolution and unity of consciousness. Neuropsychological experiments show that the different brain areas communicate with more or less coherence according to different states of consciousness: high values are correlated with states of psychophysical integrity and well-being, whereas low values with states of conflict and depression. If we expand isomorphically these brain discoveries, we will have four main general states of coherence: from disgregation to unity, which represents an important element, in the General System Theory, to differentiate between inanimate and animate system, and to understand how billions cells become a single living organism, and then how billions of human beings could eventually generate planetary consciousness. In this light the resolution of the global ecosystem crisis implicates human transformation from a low to a highly coherent state of consciousness. The key to the entire process seems to be the coherent nature of consciousness. Source: NITAMO FEDERICO MONTECUCCO

Nowadays it becomes necessary to addopt coherence as soon as possible. Proper vibration of your hearth coherence is, among other things, the key to activating the fifteen and twentytwo chakra systems. Proper vibration of your hearth coherence is, among other things, the right key in Golden Age of every Human Being, in Golden Age of Humanity.

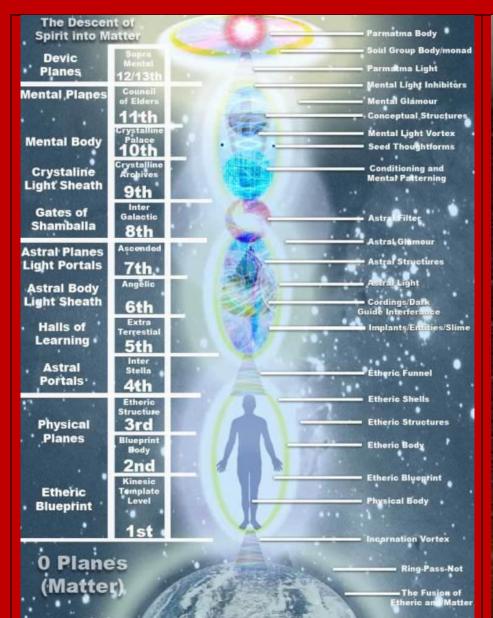

Per my experience, you cannot mentally learn coherence, you cannot win it from books, seminars, videos. Coherence is a certain vibrational state, energy level. Per my experiances, Coherence can be extended by the principle of forced oscillation.

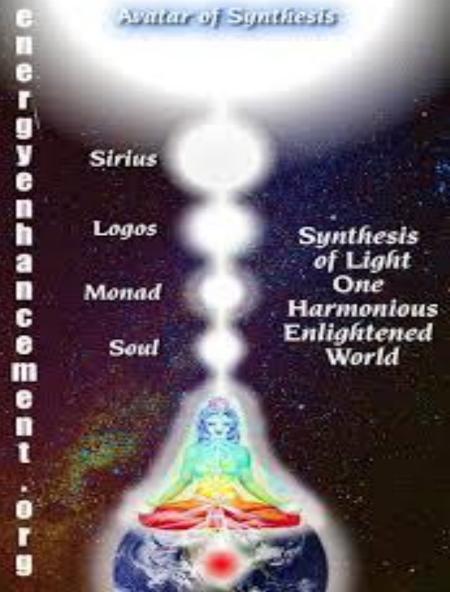

This is exactly what is happening in my Program Program AWAKENING & STRENGTHENING OF YOUR VIBRATION OF HEART COHERENCE.

In this Program AWAKENING & STRENGTHENING OF YOUR VIBRATION OF HEART COHERENCE, the whole Worldwide Group of participants will on energy level boost their vibration of coherence, the Global Coherence and the Coherence of our Planet Earth and of Space.

So don't miss it, it starts on Wednesday, 11.12.019. This term od executing of Program AWAKENING & STRENGTHENING OF YOUR VIBRATION OF HEART COHERENCE, is under extremely favorable conditions, because Schumann's resonance reached a record value of 158Hz on 6/12/01. You can read more about this and some of the topics in this e-book under this link. Under this link you will also find an invitation to apply to my Program. Its huge benefits can be achieved right from home or from anywhere, without a computer and without a phone. However, it should be reported immediately, as it will start on Wednesday, 11.12.019. Please, take this Invitation as my personal Invitation for you.
