4.

With reason I am doing exception and during its lasting public expose our Project of Developing new Product:

Exposed:

Our current development of needed new products, which is dedicated also to natural strengthening of vitality of Olive trees on the level of their Life forces, is focused on such mode of strengthening their own vitality, thus implicate strengthening of their own immunology and thus to the strengthening of their own resistance to the **Olive trees bacterial blight caused by bacteria Xylella fastidiosa**. As result we may expect natural, sustainable solution with our new, myself developed, advanced Natural Bio-Quantum Biostimulant, **without containing active substances**.

Nevertheless, it is not for the same reason, but it was comparable to the consequences - I'm talking about box (buxus) blight, which caused the death of the plants blocked capillary system, which was caused with box blight. My own developed product, Natural Bio-Quantum Biostimulant without active substances, with production code X90 (<https://lnkd.in/dH7mV9E>) which we produce in my entrepreneur company, has proven to be very effective to solve causes of those problems (<https://lnkd.in/dH7mV9E>) . This fact encouraged me for development of our new Natural Bio-Quantum Biostimulant, as is stated above in this paragraph.

Announcement about development of this new product was already published also on my EN web site under title: WHY IS THERE NO MORE PEACEFUL IN OLIVE TREES PLANTATIONS....., available is also [under this link](#).

Business cooperation possibilities: In our projects of development of our new products, for stages of field trials in real growing conditions and validation, we cooperate also with Institutions (appropriate Universities, Institutes, High schools), **independent** agriculture consultants, experts & academics from field of agriculture and farmers.

Thus we always accept and collect interest of interested Institutions (appropriate Universities, Institutes, High schools), **independent** agriculture consultants, independent agricultural experts & academics and farmers for this kind of business cooperation possibilities for our current and future projects. Private R&D agricultural companies and the self-employed on field of agricultural R&D are also sincerely welcome. In case of your serious interest for cooperation with us in R&D, please do not hesitate to contact me via email (coraagro@gmail.com, ortan.m@gmail.com).
