Introduction

About Company:

Official name of Company:

PH. AGROHOM., Agrohhomeopatija za rastline in škodljivce, Ing. Majda Ortan s.p., Ob Meži 30, SI 2391 Prevalje, Slovenija, EU.

Private company , 100% owned by ing. Majda Ortan

Size and age: smal company, 6 years old

Responsible person: ing. Majda Ortan, Companie's Director

Activities of the company:

- Developing of energized, sustainable natural products for plants strenghtening ,
- Manufacturing – in our own production,
- Sale them – under different brands - Cora agrohhomeopathie® and also others,
- Exclusive rights regarding to my own developed products (currently available on Slovenian market under brand Cora agrohhomeopathie®), to:
 - advice,
 - educate,
 - sharing and spread good practice achieved with products,
 - marketing,
 - export of products and also to granted rigts for their sales (distribution) on foreign markets.

GOOD BUSINESS COOPERATIONS WITH US IS POSSIBLE. WE STARTED AND WE WANT TO GROW OUR BUSINESS ALSO ON OTHER CONTINENTS, OUTSIDE OF EU! GOOD PROPOSES FOR BUSINESS COOPERATION ARE WELCOMED! FOR BUSINESS COOPERATION YOU ARE WELLCOMED TO CONTACT US!

Tomato seedlings
initial-stage and growth stage

A photograph showing tomato seedlings in a greenhouse. On the left, several seedlings are in black plastic pots. On the right, a larger number of seedlings are growing in a raised bed, supported by a vertical trellis system. The plants are green and appear to be in the early stages of growth. The background shows the structure of the greenhouse with its transparent covering.

All advanced, innovative, sustainable energized products without active substances (currently placed on Slovenian market under brand Cora agrohomeopathie®), are self developed by Ing. Majda Ortan, owner and Director of our company..

She owned 100% of their material rights, all rights for their recipes, all rights for their production technology and production (manufacturing), and all rights to produce them, to sell them, to granted rights for their sales (distribution) on foreign markets.

All innovative knowledge is till now still stayed her strong business secret. If you want to establish with her company good business relationship, you may not wait any more. We can be sure that those products without active substances, will be already in the near future on large rise. They bring in food growing innovative, clean, advanced and sustainable solutions that are needed for people, nature and the world.

Ing. Majda Ortan, spent great part of her life to develop comprehensive program of high professional, advanced, innovative, sustainable products, which are in Slovenia currently known under brand Cora agrohomeopathie®. In five growing seasons was confirmed product's very good effectiveness in professional growing. Very good practice with their usage, were already presented on scientific conferences with international participation, on Institutions of knowledge, on International projects, in Slovenian National TV reportage, in many articles, in book Symphony of balance (by Majda Ortan and Miša Pušenj), on workshops, seminars, by personal advising.

Products Cora agrohomeopathie® are innovative, self developed products for natural, sustainable cultivation with strengthening the vitality of the plants and so indirectly strengthening of plant resistance to plant diseases, pests and stress.

Their comprehensive, complex offer enables professional spraying programs for a wide range of agricultural crops.

Vital plants are more resistant to plant diseases, pests and stress.

Products are currently available only on Slovenian market.

Warning: In different countries, the legislation for such plant – strengthening products, is different.

Products Cora agrohomeopathie® do not contain active substances. Active are energy vibrations of complexis of suitable plants and minerals, which are results of homeopathic procedures , therefore they are also called energized homeodinamic (agrohomeopathic) products. Those active vibrations are stabilized on the carrier medium (43% ethanol). Thus, the shelf life of these products is 3 years.

Unlike most of today's existing products on the market, that principally work (affect) directly on the plant problems (diseases, pests, stress), products Cora agrohomeopathie® by holistic approach work directly on plants by strengthening their vitality balance and by that indirectly strengthening plant resistance to diseases, to pests, to stress due to the environmental impacts.

Products Cora agrohomeopathie® are innovative, self developed products for natural, sustainable cultivation with strengthening the vitality of the plants and so indirectly strengthening of plant resistance to plant diseases, pests and stress.

Their comprehensive, complex offer enables professional spraying programs for a wide range of agricultural crops.

Vital plants are more resistant to plant diseases, pests and stress.

Products Cora agrohomeopathie® are not phyto-pharmaceutical products → vital plants without use of agrochemicals.

They are used appropriate diluted with water, as spray, applied by the normal spraying equipment.

Recommended is preventive use – preventive use is an advantage – in the correct and timely use, may be avoid the loss of crops.

Without withdrawal period after the spraying – the crops are edible also immediately after spraying!

Products Cora agrohomeopathie® **do not contain active substances.** Active are energy vibrations of complex of suitable plants and minerals, which are results of homeopathic procedures, , therefore they are also called energized homeodynamic (agrohomeopathic) products. **Those active vibrations are stabilized on the carrier medium (43% ethanol).** Thus, the shelf life of these products is 3 years.

Effective!

Longer lasting effects.

After four hours after spraying, the rain do not wash effect of spraying anymore!

Safe for humans and animals!

Negligible carbon footprint!

Safe for the environment !

NATURAL ENERGIZED HOMEOPATHIC PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!
NATURAL ENERGIZED HOMEOPATHIC PRODUCT WITHOUT WITHDRAWAL PERIOD!

-Drosophila Suzukii (Drosophila suzukii Matsumura), come from Asia and is highly invasive alien species of insects, which appeared in Europe in 2008.

-Unlike other species of the genus Drosophilidae, has the ability to hatch eggs in healthy, undamaged mature fruits.

-Most of the damage cause the larvae, which feed on juicy part of the fruit. Further, the wounded surface are entry point for a variety of pathogens, that cause decay.

-Crop failure and introduction of additional measures, cause an increase in production costs, destroy mature crops, in the stage just before harvest or in the stage of harvest.

-Due to the phase of mature crops, attacked by this pest, repression by conventional means is very difficult, because of the withdrawal period.

-In Slovenia, its presence was first time confirmed in 2010.

Behind photo: The presence of Drosophila suzukii® in Slovenia, for the years 2012 to 2014

Source: Phytosanitary surround portal - UVH

On the initiative of some professional agronomists - advisers, was ing. Majda Ortan s.p., in year 2015 developed new product Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii*.

The product has been confirmed by the Institute of Organic Agriculture (Faculty of Agriculture and Life Sciences, University of Maribor, Slovenia), that IS ALLOWED IN ORGANIC PRODUCTION.

Natural energized homeopathic PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

WITHOUT WITHDRAWAL PERIOD AFTER USING THE PRODUCT!

PRESENTATION OF FIRST EXPERIANCES WITH TESTING OF PRODUCT Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii*

(Photos: photo arhiv Iztok Janežič)

NATURAL ENERGIZED HOMEOPATHIC PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

NATURAL ENERGIZED HOMEOPATHIC PRODUCT WITHOUT WITHDRAWAL PERIOD!

First time it was tested in year 2015, under real production conditions of the early cherries.

Functioning of the product X104 Cora agrohomeopathie NaturSTOP CONTRA Drosophila suzukii *, was monitored in the orchard of cherries on the surface of 0.50 hectares at a location along the Dragonja in Sečovlje valley (Slovenia).

The test was performed in cooperation of Slovenian partners:

- PH. AGROHOM., Agrohhomeopatija za rastline in škodljivce, Ing. Majda Ortan s.p., (product's developer and producer) - develop and provide products,
- Iztok Janežič – specialist of fruit growing, (Sivis, d.o.o.) -test plan and professional monitoring,
- Dejan Pribač, farmer - spraying his cherry plantation per test plan
- and some other participations.

Cherry plantation, where we in 2015 performed the field test of the effectiveness of the product Cora agrohomeopathie X104 Drosophila suzukii*

*Explanation: The meaning of the name is in detail explained in the product catalog [here](#). I point out, that the word "CONTRA" in the names of Cora agrohomeopathie ® products is the random word combination and does not mean "against".

PRESENTATION OF FIRST EXPERIENCES WITH TESTING OF PRODUCT Cora agrohomeopathie X104 NaturSTOP-CONTRA Drosophila suzukii*

(Photos: photo arhiv Iztok Janežič)

NATURAL ENERGIZED HOMEOPATHIC PRODUCT WITHOUT CONTAINING ACTIVE SUBSTANCES!

First time it was tested in year 2015, under real production conditions of the latest cherries.

Weathering was in season 2015 at the beginning of the harvest cherries, quite favorable for cultivation.

In the days around May 15, due to the high humidity and good air temperatures, was represent good conditions for reproduction and possible high problems with Drosophila suzukii on the early varieties of cherries.

With the use of the product Cora agrohomeopathie X104 Drosophila suzukii*, we have very effectively avoid to this danger, at the later ripening varieties, until the finishing of harvesting at 15 June 2015.

The first treatment with product Cora agrohomeopathie X104 was done, when it was established almost 80% of the damage of fruits of early variety 'Burlat' and part of the fruit variety 'New Star', in terms of 14., 15. and 29. May 2015. SINCE IN THE SAME PLANTATION, THE LATEST VARIETIES OF CHERRIES WAS SPRINKLED AND OBSERVED, THIS WAS THE PREVENTIVE USE OF PRODUCT Cora agrohomeopathie X104 Drosophila suzukii* FOR LATEST VARIETIES OF CHERRIES!

Checking of baits was performed 15/6/2015, after harvesting of all varieties of cherries in test. After the examination and identification in the laboratory, it was found, that 73% of checked caught insect, belonged to the specimen Drosophila suzukii.

Thus it was confirmed the presence of high populations of Drosophila suzukii at the location during the performance of the experiment.

After treatment, the harvest of later varieties 'Isabelle', 'Celeste' 'Garnet', 'Canada giant', 'Van', 'Kordia', 'Regina', on fruits there was NO DAMAGE. THE FRUITS WERE HIGH QUALITY AND SUITABLE FOR STORAGE AND SALE.

Our good practice of sustainable control of seed's weeds:

Case from cherry orchard – with products Cora agrohomeopathie X7 NaturSTOP-less one-year weeds; by strengthening vitality/resistance to thermodynamic stress

(Photos: photo arhiv Iztok Janežič)

- In the last two years have been by the effects of the operation of this product, already satisfied home gardeners and also some of professional growers of vegetables.
- Practical experiences are the effects of the operation of the product, this year we disseminated among professional fruit growers.
- In the year 2016, we monitored and disseminate practical experiences of the effects of the functioning of this product, among some Slovenian fruit growers, under professional monitoring of Iztok Janežič, specialist of fruit growing (Sivis d.o.o., Ljubljana, Slovenia). Best results were recorded by fruit grower, Avbelj Brane. (Slovenia), in his cherry orchard.
- It was confirmed that for the good effect is extremely important to follow to some key parameters :
- Spraying should be carried out before the seeds germinate, when the soil temperature reaches about 5 degrees Celsius. If this phase delays, targeted effects are missed.
- The effect of the spray can be interrupted by frost. If after spraying gets to spring frosts, is needed to spraying again - and this makes sense only on condition, that weed seeds are not yet germinated.
- **Considering these facts, the results are excellent.**

PRODUCTION OF VEGETABLE SEEDLINGS WITH STRENGTHENING THEIR OWN VITALITY AND THUS THEIR OWN IMMUNOLOGY

*(Source: Production of vital vegetable seedlings - Strengthening of their own resistance, article published in Slovenian Magazine Kmetovalec, 2/16, by author Ing. Majda Ortan
Photos: by Tanja Hribar)*

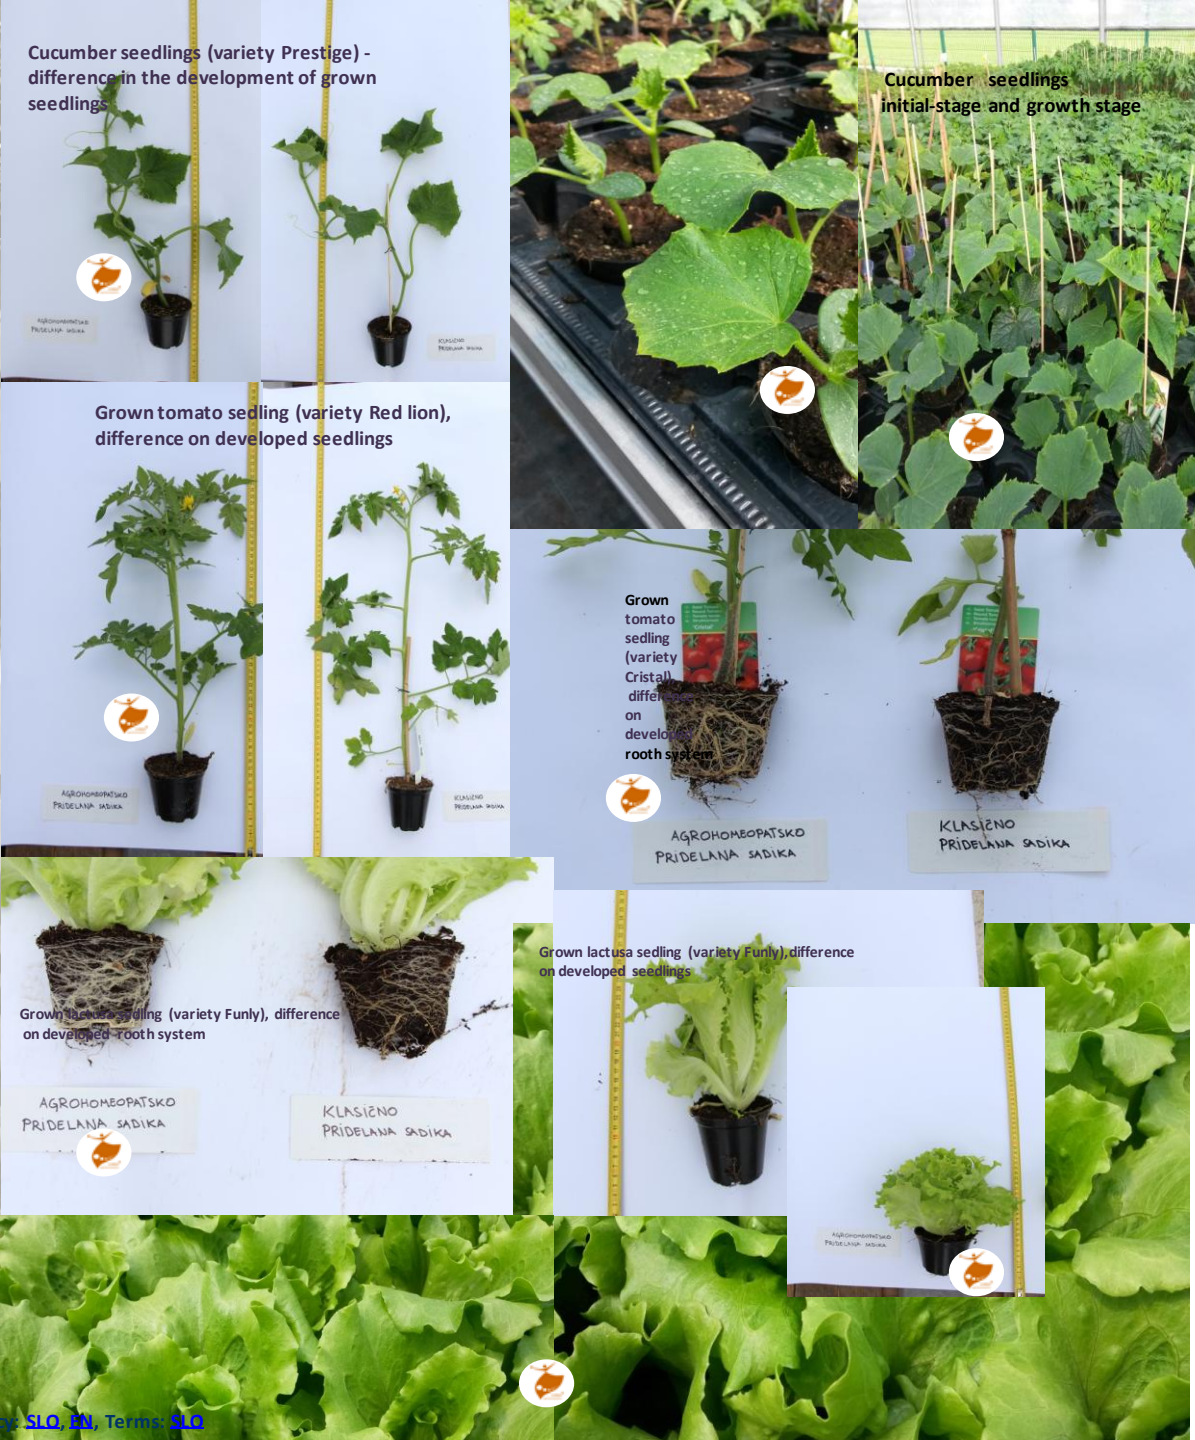

Production of vegetable seedlings is intensive increasing trend.
Consumer's interest in sustainable grown seedlings of vegetables, is ever growing.

The sustainable cultivation (on "classic way"), usually means more manual work, more seedlings collapses due to non-resistance. Because of non-resistance of plant's seedlings, is such mode of production of vegetable seedlings, often under question.

With program and products Cora agrohomeopathie®, we may do it excellent.

In year 2015, was such program great implemented in Arboretum, Volčji Potok (Slovenian state park and renowned garden's centre).

You may see some considerable differences in developed roots and developed grown seedlings. Those, with sign (logo) of Cora agrohomeopathie® are growned with products Cora arohomeopathie®, and on such mode strenghteneing their own vitality and their own immunology to diseases, pests, stress. As it is visible, they are much stronger as those, which were grown on classical mode.

Case of professional growing vegetables per sprinkling program with products Cora agrohomeopathie[®], (years 2014, 2015)

Cooperation of:

Grower: farmer Ivan Kelenc, Formin at Gorišnica, Slovenia,
production area: approximately 32 ha.

Sprinkling program, products, consulting: PH. AGROHOM.,
Agrohomeopatija za rastline in škodljivce, Ing. Majda Ortan,
s.p., Slovenia, www.cora-agrohomeopathie.com

Farmer's regular professional agriculture adviser in: Miša
Pušenjak, Chamber of Agriculture, Slovenia - Agriculture and
Forestry Unit of Maribor, Slovenia

Project focus, general:

The farmer produced in compliance with Integrated
production system.

In the years 2014 and 2015, Cora agrohomeopathie[®],
products were used.

Farmer avoided the use pesticides.

Very good results were achieved. Farmer present some of
them to Slovenian public on Slovenian national TV - RTV
SLO 1, in agriculture emit People and Earth.

Case of professional growing vegetables with products Cora agrohomeopathie®

The farmer shared his great experiences with products Cora agrohomeopathie® on the agricultural broadcast People and Earth, played on the Slovenian national TV - RTV SLO 1 on 28.6.2015

Photo: The farmer Ivan Kelenc, was in growing season 2014, with the use of products Cora agrohomeopathie, on cca 32 ha,

harvested about 1.000 tons of healthy vegetables. And this despite to the fact, that the weather in the growing season 2014 was extremely wet! Such harvest in the past, he has been grown in good growing seasons, by integrated production system, with the use of pesticides!

Good practice case: HOPS GROWING BY SUSTAINABLE WAY - per program with products Cora agrohomoepathie®, by farmer: Šlander, sort of hop: Aurora, year 2013 (Photos: photo arhiv Majda Ortan)

Field trial was performed by cooperation of:

- Štefan Šlander - grower- farmer, Savinjska Valey, Slovenia,
- PH. AGROHOM., Agrohomoepatija za rastline in škodljivce, ing. Majda Ortan, s.p - developing of products Cora agrohomoepathie® for hops, sprinkling program for hops with products Cora agrohomoepathie®,
- Farmer's profesional adviser – employee in Hmezad exim, d.d., Slovenia; Hmezad exim d.d., Slovenia; this company was at company PH. AGROHOM., Agrohomoepatija za rastline in škodljivce, ing. Majda Ortan, s.p. also buy Cora agrohomoepathie® products for experiments in hops.
- Institute of Hop Research and Brewing, Žalec, - additional professional monitoring of sprinkling hops.

The growing season of 2013 could be remembered after severe drought. Farmers were watered in the fields so said “day and night”, also in hops...

“Our hops”, we did not watered. Vital plants grown with Cora agrohomoepathie®, products are more resistant to vegetal stress due to drought.

It was also on our hop, which showed excellent results in the quantity and quality of hops, grown in our field trial -summary on the next slide.

In next year (in 2014), hop with Cora agrohomoepathie® products were grow growers: Orožim, Šporn, Škrabar, Šlander – all from Savinjska valey, Slovenia.

In that growing season, there was a lot of rainfall. Results of our trials were interesting and instructive. Fore more detailed information you may ask me on email address:

PLANT'S DISEASES AND PESTS, ECONOMICALY DAMAGE
caused by diseases and pests:

Weather conditions in 2013 was generally unfavorable to development of downey mildew.

Red spider mite -Tetranychus urticae:

First appearance was on 8th of August 2013, it were present in constant population – **it has not been caused economically important damage by Red spider mite -Tetranychus urticae !**

Hop flea beetle - Psylliodes attenuatus:

both generations were present – **it has not been caused economically important damage by Hop flea beetle - Psylliodes attenuatus!**

Hop Damson Aphid - Porodon humuli:

showed interesting population dynamic. After first spraying - cycle, their population grown up. Explanation is, that on starting of effects on energy balance system of plants, some plant's reaction occurred. So, for short time plants weakened, than their immunology started to strengthen. On weakened plants came more aphids, but despite of quick improvement of hop vitality, they didn't caused damage. Results of hop aphids indicate different mechanisms of control of pest population compared to control applications.

It has not been caused economically important damage by Hop Damson Aphid - Porodon humuli!

RESULTS – YIELD PER QUANTITY
AND QUALITY:

Harvested on 6th of September, 2013.

Yield:

• **Quantity:** calculated 1.182 kg/ha (overall avg. 2013: 1186kg/ha) → **we got practically the same yield, without withering of hop – despite dry growing season!**

• **Quality:**

• **Alpha acid content:** 7.4 % (overall avg. 2013: 5,7%) → **We got for cca 29% better quality parameter of Alpha acid content!**

• **Corns:** health, no economical damage!

[n.v.](http://www.cora-agrohomeopathie.com/en/more-directe)

Dear Sir!

From this presentation You had
possibility to seen some results of my
advanced, sustainable, innovative,
energized, homeodinamics products
without containing active substances.

Are You intersted to become part of
those nowadays and tommorow's
advanced Solutions in Food growing?
To have from such growing good and
health crops, good profite and keep
Environment , Nature and resouses
health and clean?

Here are some good news for You:
Good business cooperations with us is
possible. We spread our business
abroad and we want to grow it also on
other Continents, outside of EU! Good
proposes for our business cooperation
are welcomed!

If you have interest to cooperate with
us, You are wellcomed to contact us!

Sincerely,

Majda Ortan
